**CompView Promotes Three
To Audio Video Integration Management Positions**

BEAVERTON, OR — Sept. 27, 2010 — CompView, a leading audio video consulting, design and installation firm announced promotions for three employees today. Tom Yerkes was promoted to General Manager for California, Pat Wheelon was promoted to Corporate Systems Manager and Eric Boyd was promoted to System Integration Manager.

Yerkes has 15 years of experience in the audio video industry and specializes in helping Fortune 500 companies, governmental organizations and large education clients implement enterprise-wide AV solutions. Yerkes has been with CompView for 10 years and in his new role as General Manager for California, will manage CompView's sales and integration teams serving San Diego, Los Angeles, the Inland Empire and the San Francisco Bay Area.

Wheelon has 18 years of construction management experience; 8 years as a general contractor and 10 years with CompView working on the design, management and installation of audio video systems. Notable projects include: Big AI's, Museum of the Rockies and Amazon. In the newly created Corporate Systems Manager position, Wheelon will provide oversight company-wide on the design and management of complex AV integration projects.

Boyd has 15 years experience in commercial audio video / broadcast design and integration and has been with CompView for 4 years. His recent projects include; Oregon Convention Center, Mercy Corp's Portland Action Center and University of Oregon. As System Integration Manager for the Portland office, Boyd will manage a team of 12 audio visual designers, project managers and technicians.

Founded in 1987, CompView is a leading audio video and group communication technology integration firm. The company provides audio video design, engineering, installation, programming, and contract services to clients nationwide from their headquarters in Beaverton, Oregon, offices in six major cities and through their expert network of audio video partners.
