

AVS 2000/AVS 2000+ Standard Audio Visual System

The CompView AVS series of pre-designed audio visual systems deliver simplified “plug-in and go” functionality for typical meeting rooms, conference rooms or training rooms.

AVS Benefits:

MORE COST EFFECTIVE ▶ The design, engineering and custom programming are already done so you simply pay for the AV equipment and installation.

FASTER INSTALLATION ▶ Pre-designed and in-stock so your system is installed sooner.

The AVS 2000 is a standard audio visual system designed to provide video projection, reinforced audio and flexible inputs so you can connect computer and video sources at two locations in a small meeting room. It also offers reliable control of the projector and speakers from a wall mounted control panel.

Control Panel

Screen

Display

CompView will professionally install a wall plate to easily connect a computer and a DVD player or other video source.* From that wall plate the visuals are transmitted to the ceiling mounted projector then onto the screen at the front of the room.

PROJECTOR ▶ 3000 ANSI lumens brightness, XGA resolution, and DLP technology.

SCREEN ▶ wall mounted manual pull-down with a 100" diagonal viewable area and 4:3 aspect ratio.

WALL MOUNTED INPUT PANELS ▶ 1 VGA input (computer) with audio, and 1 composite video input with audio for any user supplied input source.

Audio

Two flush-mounted ceiling loudspeakers powered by a small amplifier receive the audio signal and provide reinforced sound throughout the room.

Control

This system includes a more extensive and flexible control system with a reliable wall mounted push button control panel. This panel controls the projector on/off functions, switching between computer and video sources, video picture mute and adjusting audio volume up/down and mute.

*Computer, with DVD drive and/or other video source provided by the client. All mounting hardware, cables, connectors and labor to install the AV equipment are included in this package

Client shall be responsible for providing all electrical power, analog phone line and all network drops and services.
