

## AVS 500

### Basic Audio Visual System

The CompView AVS series of pre-designed audio visual systems deliver simplified “plug-in and go” functionality for typical meeting rooms, conference rooms or training rooms.

#### AVS Benefits:

**MORE COST EFFECTIVE** ▶ The design, engineering and custom programming are already done so you simply pay for the AV equipment and installation.

**FASTER INSTALLATION** ▶ With a pre-designed AV System we stock the equipment so your installation can start sooner.

The AVS 500 is a simple ceiling mounted projector system for small meeting or conference rooms. This affordable system makes it easy to plug-in and start presenting.

## Equipment

### Display

### Input Panel

### Screen

### Display

CompView will professionally install a wall plate to easily connect a computer and a DVD player or other video source.\* From that wall plate the visuals and audio are transmitted to the ceiling mounted projector then onto the screen at the front of the room.

**PROJECTOR** ▶ 3000 ANSI lumens brightness, XGA resolution, and LCD technology.

**SCREEN** ▶ wall mounted manual pull-down with a 84"-100" diagonal viewable area and 4:3 aspect ratio.

**WALL MOUNTED INPUT PANEL** ▶ 1 VGA input (computer) with audio and 1 composite video input with audio for any compatible user supplied input source.

### Audio

Sound reinforcement for a source plugged into the wallplate is provided by the projector's internal speakers with volume control accomplished using the projector remote.

### Control

The projector remote is used for switching between sources and to control the volume of the audio coming through the projector's on-board speakers.

\* Computer with DVD drive, DVD player and/or other video source provided by the client. All mounting hardware, cable, connectors and labor to install the projector, loudspeakers and projection screen are provided in this package.

Client shall be responsible for providing all electrical power, analog phone line and all network drops and services.
