

## PROJECT PROFILE

Consulting \* Design/Build \* Installation \* Project Management

### Accenture

When designing their new office building, Accenture – one of the world's largest management and technology consulting firms – wanted a boardroom for executive presentations that included the latest audioconferencing and projection technology, yet was simple and easy to use.

As a result, all of the equipment in the Elliott Bay room can be effortlessly controlled from anywhere in the room with the wireless touchpanel control system. To conduct an audioconference, all participants can be called directly from the control panel using the telephone keypad. Four speakers mounted in the ceiling are combined with eight microphones recessed flush into the tabletop to provide audio clarity.

#### REGISTERED AND BONDED

- Oregon CCB#134110, 34-514CLE
- Washington COMPVI\*015DT, COMPVV1961CD
- California C-7#778555
- Minnesota TS00701

The room also utilizes an InFocus ceiling-mounted LCD projector and an automatic drop-down screen encased in the ceiling. Recessed covers in the conference table flip up to provide computer interfaces for easy connection for laptop users to connect into the projection system. To enhance the simplicity of the design, the remainder of the equipment is stored within custom-built cabinets along the wall.
