

SMART Board® M600 series interactive whiteboard

Intuitive design and dual-touch controls make it easy for educators to turn lessons into learning experiences.

- Dual user capabilities
 - Touch gestures
 - SMART Notebook® collaborative learning software
 - SMART ink™

Collaborate Naturally™

Choose the projector that best suits your needs

U100

The ultra-short throw U100 provides clear, dynamic images with 3,600 lumens brightness. The U100 is HD-ready with dual HDMI and USB connectivity. It comes in two models to support both widescreen and standard interactive whiteboards.

V30

The budget-friendly V30 supports standard interactive whiteboards, providing a bright HD image with 3,000 lumens on a short boom.

SMART projectors' excellent lamp life reduces classroom downtime and maintenance costs.

Key Features

Dual touch capabilities

DViT® technology supports two simultaneous touches, making it easy for students to work together at the same time.

Freestyle interaction®

Two students can collaborate without having to switch to a multiuser mode or work on specific areas of the surface.

Touch gestures

Flick, rotate and zoom using simple hand-gestures. A natural touch experience means students and teachers write, erase and perform mouse functions using a finger or pen.

SMART Notebook® collaborative learning software

The world's premiere education software, SMART Notebook® facilitates engaging and interactive learning experiences while providing the flexibility to respond to the needs of learners in real-time.

SMART Ink

Write over applications, websites and videos as legibly as on paper. Your notes become objects that you can move and manipulate.

Intuitive, multiuser pen tray

Quick access to ink color sections, on-screen keyboard and help functions make it easy for teachers to run lessons.

Durable surface

The low-gloss surface is optimized for projection, ensuring that content can be clearly seen from anywhere in the room. The surface is also easy to clean and is compatible with dry-erase markers.

Projector controls

The SMART Board® M600 series, with projector controls, is compatible with the SMART U100 projector and with Epson PowerLite® 530, 580 and 585W projectors for SMART. The projector control panel is integrated into the pen tray to easily control projector power, volume and input select.
